

For the digital transformation in auditing, we are looking for reinforcements **across locations starting immediately!**

## AI Engineer & Data Science Specialist (m/f/d)

As an AI Engineer & Data Science Specialist, you will drive the **development and integration of AI-powered applications** using foundation models and modern AI techniques. Your focus will be on building scalable, production-ready AI solutions that enhance automation, decision-making, and data-driven services.

Your responsibilities include:

- > **Designing and integrating** AI-driven microservices and automation solutions.
- > Working with **foundation models** (e.g., GPT, Llama, Claude) and optimizing them for specific business applications.
- > **Deploying and monitoring** AI models in production environments.
- > **Developing and maintaining** RESTful APIs for AI-based applications.
- > **Collaborating with cross-functional teams** to create scalable and robust AI systems.

Your profile:

- > **two to three years** of practical experience in **AI engineering**, including RAG and fine-tuning foundation models.
- > Proficiency in **Python or R**, with a focus on machine learning and AI applications.
- > Hands-on expertise in **NLP**, anomaly detection, classification, or time series analysis.
- > **Software engineering** skills, including clean code, version control, and CI/CD.
- > Familiarity with **cloud-based AI** solutions (e.g., Azure OpenAI, AWS Bedrock, Hugging Face).
- > Fluency in English (German is a plus).

Nice to Have:

- > Knowledge of MLOps, model deployment, or vector databases for AI applications.
- > Experience in DevOps practices for AI systems.
- > Background in accounting or controlling, particularly in data-driven decision-making.

### Womit können wir punkten?

**Future-oriented task field:** With us, you work with highly topical issues and ensure that your colleagues in the specialist area are supported with modern methods. In doing so, you open up new possibilities that find immediate application in the everyday life of auditing.

**Onboarding:** You should feel comfortable with us from the very beginning. Our digital onboarding tool enables you to start smoothly without complicated hurdles and question marks in your head. This way, you have all the information and your personal contacts at your fingertips with a click. Additionally, your mentor will be there to support you with advice and assistance. Welcome on board!

**Collegiality:** Together we are strong. Our innovative, nationally active team considers each person as an individual and places great emphasis on the team spirit.

**Outstanding career opportunities:** Look forward to individual support, challenging project work, and a strong network.

**Mobility budget:** We provide you with 100 EUR gross per month, which you can use flexibly and sustainably for your needs in a tax-optimized manner - whether for public transport, single tickets, or the Germany ticket.

**Benefits:** Furthermore, you can take advantage of offers such as Jobrad and corporate benefits (employee discounts).

Innovative answers, modern technologies and strong team spirit: That is Data Analytics made by RSM Ebner Stolz.«

Dr. Dag Tanneberg
